

Come and join us on our extended online Python Coding workshop!

Robogals Melbourne is holding a **free virtual coding workshop** during the holidays on Saturday, 2 October 2021 from 11:00 AM to 12:30 PM. In the workshop, students will be introduced to the different types of engineering and their impacts on our daily lives through interactive Kahoot! quiz. Students will then take part in a series of coding activities that will introduce them to the Python language and develop their problem-solving skills, while exploring sophisticated coding concepts through several challenges.

We will also be providing new challenges for students who have **participated in one of our previous Python workshops**, or for those who have previous coding experience in general, so we highly encourage them to register for this extended workshop!

Students of all experience levels from Year 3 to 9 are welcome. We hope to see your students participate in this event!

Date : Saturday, 2nd October 2021
Time : 11:00 AM - 12:30 PM
Location : Online (Zoom link to be provided upon registration)
Cost : FREE
Registration Link : <https://forms.gle/shRcVGmGCpM2xs886>

For any questions regarding this event, please contact melbourne.schools@robogals.org. We hope to see you there!

Robogals Melbourne is a student-run, global organization. We aim to inspire female students to pursue STEM degrees and careers through offering free robotics and engineering workshops for primary and high school students. Here is a [sneak-peak](#) of what our in-person EV3 workshops usually involve. To find out more about what Robogals does please visit [our website](#).
